

StrikeShield™

360° Lightning

Protection System

A large, dramatic background image of a lightning storm with multiple bright white lightning bolts striking down against a dark, stormy sky. The bottom of the image fades into white.

A Lightning Protection System Designed to Maximize Your Uptime

METTLER TOLEDO

Stops Lightning Damage to Load Cells and Instrumentation

Our exclusive 360° StrikeShield™ lightning protection system consists of equipment designed specifically to prevent lightning from damaging load cells and instrumentation. It's backed by more than just a very good warranty; it really protects.

Less Downtime

Experienced truck scale users know that downtime can be very costly. It's not just the expense of getting a scale back up and running after a lightning strike. It's the value of the product that doesn't get weighed that can really be costly. Our 360° StrikeShield lightning protection system increases uptime.

METTLER TOLEDO load cells have been independently tested, adding to the protection system. They've passed a Lightning Test (by Lightning Technologies, Inc.) and the Robust Digital Electronic Surge Immunity Test (CSL 1027/EIC 801-S).

Your nearest METTLER TOLEDO office or authorized distributor can answer all your lightning protection questions.
